DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1 and 3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 3 are rendered indefinite by the use of the phrase "L10 type." It has been held that the addition of the word "type" to an otherwise definite expression extends the scope of the expression so as to render it indefinite. *Ex parte Copenhaver*, 109 USPQ 118 (Bd. App. 1955).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-8 and 10-14 are rejected under 35 U.S.C. 102(b) as being anticipated by Suzuki et al. (US 6068739).

Suzuki et al. disclose a magnetic recording medium having a (100) oriented MgO seedlayer disposed on a nonmagnetic substrate, a Cr based underlayer having a (100) orientation,

Art Unit: 1773

a FePt or CoPt L1₀ oriented magnetic recording layer having alternating monatomic layers of Fe or Co and Pt. The structure is formed via a DC magnetron sputtering method at a substrate temperature of 400 °C.

With respect to the thickness limitations of claims 1 and 11, Suzuki et al. meets these limitations because the reference teaches the deposition of monatomic layers of Co or Fe alternating with monatomic layers of Pt. It is well known in the art and recognized in Applicant's own specification that the thickness of a monatomic layer of Co is 1.77 Å, Fe is 1.43 Å, and Pt is 1.96 Å (see specification, paragraph 18 for example).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 9 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Suzuki et al. (US 6068739).

Suzuki et al. teach all of the limitations of the claims as detailed above, except for the claimed Ku value.

The reference teaches forming a structure that is substantially the same as that claimed by Applicant (i.e. same materials, layer thicknesses and crystalline orientations) by a method that is substantially the same as claimed (i.e. formed by DC magnetron sputtering at a deposition temperature of 400 °C. Thus, one of ordinary skill in the art at the time of invention would have

expected the structure taught by Suzuki et al. to inherently have the same perpendicular magnetic anisotropy as the claimed invention.

It has been held that where claimed and prior art products are identical or substantially identical, or are produced by identical or substantially identical processes, the burden of proof is shifted to applicant to show that prior art products do not necessarily or inherently possess characteristics of claimed products where the rejection is based on inherency under 35 USC §102 or on prima facie obviousness under 35 USC §103, jointly or alternatively. *In re Best, Bolton, and Shaw*, 195 USPQ 430. (CCPA 1977).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 6599646 is cited as art of interest.
